Sonoma Horse Park Temperature Monitoring Log

Trainer Name: _____

Instructions: record the rectal body temperature of horse 2x per day, every morning and evening. For accuracy, it is recommended that temperatures are recorded prior to administering daily medications and at least 2 hours after shipping or strenuous exercise.

Daily medications that may affect temperature results: bute, ketofen, banamine, dexamethasone, dipyrone, equioxx/previcoxx.

Please email any questions and all forms to biosecurity@sonomahorsepark.com.

Note: A body temperature recording above 101.5*F (or 101*F if on medication listed above or other medications known to suppress fevers) must be reported to SHP Management by contacting Lauren Kee at 415.527.8164
